ABOUT ME

Computer Science student at King Mongkut's University of Technology North Bangkok with hands-on experience in web development and software testing.

Skilled in Playwright, functional and manual testing, defect reporting and frontend development using React, Material UI, and Bootstrap. Passionate about delivering reliable software with strong functionality and excellent user experience.

OBJECTIVE

Aspiring QA Engineer Intern with skills in Playwright, manual testing, and web development (React). Looking for an opportunity to contribute to software quality and grow in a professional environment.

PROJECT

Game Purchase & Rental Website (Feb–Apr 2024)
- frontend using React, Material UI, and Bootstrap.
- Designed and executed manual test cases for login, cart and checkout flow.
- Automate Test using Playwright, Manual Test Cases.

Mini Project: Chatbot by n8n (Sep 6-10 2025)
- Developed a chatbot system using n8n workflow automation to integrate AI responses.
- Built the frontend interface with React for smooth user interaction.
- Integrated the Google Gemini AI model to provide intelligent.
